EDUCATION

Kolhapur Institute of Technology's College of Engineering

Bachelor of Engineering in Computer Science and Engineering, CGPA - 8.22/10.00

Kolhapur, Maharashtra

2021 - 2024

Government Polytechnic, Kolhapur

Diploma in Electronics and Telecommunication, Percentage - 97.06

Kolhapur, Maharashtra

2018 - 2021

SUMMARY

Mobile and full-stack developer with 2+ years of experience building high-performance, cross-platform applications in Flutter (Dart) using Provider, Riverpod, and GetX for state management, dependency injection, and routing. Has independently deployed and maintained 3+ applications on the Google Play Store and Apple App Store, managing the full release lifecycle from build automation to store compliance. Experienced with socket-based real-time features, audio integration, Docker-based CI/CD, and pixel-accurate Figma-to-code implementation, working in Agile/Scrum teams. Complements mobile development with Node.js microservices, Firebase, and cloud-native infrastructure (AWS, Kubernetes) for real-world domains such as agriculture and analytics, with a strong focus on performance, scalability, and secure development practices.

WORK EXPERIENCE

SaffronEdge - Tech Universe

Software Engineer ([Application Link](#))

Kolhapur, Maharashtra

Feb 2024 – June 2026

- Led the full-stack development of the Krishi Sanskriti mobile application as team lead of an 8-member engineering group. The app, built using Flutter and deployed on the Play Store, currently serves over 10,000 farmers, offering agri-commerce, expert consultations, farm data management, and real-time communication.
- Used Provider, Riverpod, and GetX for state management, dependency injection, and route management across Flutter modules, choosing the appropriate approach per module to balance boilerplate, testability, and rebuild performance. Deployed and managed infrastructure on AWS EC2 using Kubernetes, integrated with ALB Ingress for secure external access, and incorporated Prometheus and Grafana for performance monitoring and uptime analytics.
- Designed a modular microservices backend using Node.js and Firebase Cloud Functions, exposing RESTful APIs for chats, offers, geolocation targeting, and community interactions. Implemented real-time Firestore-based updates and socket-based communication to support seamless farmer engagement and field operations.
- Integrated audio recording and playback for farmer voice queries and consultations within the app.
- Integrated the full Firebase ecosystem including Authentication, Cloud Messaging (FCM), Crashlytics, App Check, and Analytics, ensuring stable operations, secure access control, and actionable usage insights.
- Implemented high-performance search and pagination APIs using timestamp-based infinite scroll with advanced geospatial and category filters. Optimized post loading and interleaved top-of-the-day and promotional content, reducing prior load times by up to 60%.
- Implemented UI screens with pixel-accurate fidelity to Figma designs, and ran development in Agile/Scrum sprints, coordinating stand-ups, sprint planning, and reviews across the 8-member team.
- Independently built, released, and maintained 3+ cross-platform Flutter applications across the Google Play Store and Apple App Store, handling versioning, store listing compliance, and post-release monitoring.
- Established automated CI/CD pipelines using Git and Jenkins, enabling continuous integration, automated testing, build processes, and seamless Google Play Console updates, significantly reducing release overhead and ensuring production reliability.

Education Technology, IIT Bombay

Machine Learning Intern

Mumbai, Maharashtra

May 2023 - Oct 2023

- Implemented PixelCNN, a generative model for image synthesis, utilizing masked convolutions and autoregressive modeling techniques.
- Developed an understanding of conditional pixel-wise probability distributions, enabling sequential image generation based on previously generated pixels.
- Utilized Google Colab, TensorFlow, and deep learning frameworks to build and train the PixelCNN model, gaining hands-on experience in model experimentation and debugging.

PROJECTS

[KIT's Event Spectra](#) | *Python, Natural Language Processing, Flask, LangChain, OpenAI, ReactJS*

- Led the development and implementation of a chatbot solution as the team leader, coordinating with a team of five individuals to integrate the chatbot functionality seamlessly into the project.
- Integrated machine learning model, such as OpenAI's GPT-3.5, into the chatbot architecture with the help of LangChain framework, enabling intelligent responses to user queries and enhancing the overall user experience.

[EverDry](#) | *Android Studio, Java, Google Firebase*

- Crafted an innovative app for Gauri Engineering Services, enabling seamless transition from offline to online operations, enhancing accessibility and market reach.
- Enabled users to schedule appointments for waterproofing solutions and purchase related products, extending accessibility and convenience for property protection needs.

TECHNICAL SKILLS

Languages: Dart, JavaScript, Python, Java, SQL, NoSQL

Databases: Firestore (NoSQL), MongoDB, MySQL, PostgreSQL, SQLite

Frameworks & Libraries: Flutter, Provider, GetX, Riverpod, Node.js, TensorFlow, HTML, CSS

Cloud & Backend Technologies: Google Firebase (Firestore, Cloud Functions, FCM, Authentication, Storage), AWS EC2, Kubernetes (Kubeadm), Prometheus, Jenkins, RESTful APIs, Websockets

Tools & Platforms: Git, GitHub, Jenkins CI/CD, Google Play Console, Apple App Store Connect, Android Studio, VS Code, Linux, Google Colab

Analytics & Monitoring: Firebase Analytics, Crashlytics, Prometheus, Grafana

Methodologies: Agile/Scrum

Other: Google Maps SDK (for geolocation), App Check, Oracle VirtualBox

RELEVANT COURSEWORK

- Database Management System
- Mobile App Development
- Data Structures
- Cloud Computing

ACHIEVEMENTS

- **2nd Prize – Founders' Battleground, Bangalore** - Awarded ₹50,000 for presenting our agri-tech solution Krishi Sanskriti at a national startup competition. Represented **SaffronEdge** as part of the core product team, recognized for innovation and real-world impact.
- **Runner-ups** in a Project-Based Learning competition for **data analytics**, analyzed students' day-to-day activities and their impact on personal and corporate life.
